

Who we are

Burgmann Packings is a privately-owned company pioneering the development and production of Low Emission Technologies. Our sealing solutions help customers around the globe to reduce their environmental impact in a wide range of increasingly complex industrial processes and applications. Our products are mostly invisible, but make a difference when it comes to the reduction of harmful emissions, the increase of plant safety and efficiency as well as compliance to Health & Safety standards.

We leverage 130 years of experience with the combined resources and expertise from our highly skilled workforce in Ireland, Turkey, China and Germany to meet and exceed customer expectations in more than 40 countries world-wide.

Our Research & Development facilities in Turkey and China partner with our customers, universities and testing institutes to develop tailor-made solutions for the sealing challenges of the 21st century.

All Burgmann Packings sites are certified to DIN EN ISO 9001:2015 and various other industry specific certifications and approvals including the Nuclear Power industry and Oil & Gas.

Application Engineer (m/f/d)

We are looking for an Application Engineer (m/f/d) to strengthen our team in our location in Istanbul (Tuzla), Turkey. In this function you are responsible for application engineering support of our customers in Germany and abroad.

Joining Burgmann Packings Turkey is a great opportunity: We offer a responsible position in an international company, a great working atmosphere and the opportunity to work independently.

Tasks

- Application engineering support for stuffing box packings and gaskets
- Processing of technical customer inquiries
- Complaint management
- Product management support, e.g. creation of product specifications, management and renewal of product approvals
- Gasket and packing calculation according to customer request
- Active participation in development projects
- Evaluation of customer specifications
- Evaluation and support for quality certificates
- Support to prepare quotes for industrial seals
- Creating and editing presentations and other work materials
- Conducting of customer trainings
- Technical support for various projects (e.g. production expansion, automatization projects or quality assurance measures)

Requirements

- Completed apprenticeship in technical job, bachelor or master's degree in mechanical engineering, Automatization, Industrial Engineering, Manufacturing Principles or similar education.
- Willingness for international travel activity (max. 10%)
- Proactive, self-reliant and solution-oriented way of working
- Structured working methods
- Distinct customer orientation and reliability
- Flexibility and broad interest in different topics
- "Can Do" mentality
- Excellent English and German language skills, both spoken and written
- Good knowledge of common MS Office programs

Location

- Tuzla, Istanbul, Turkey
